ABOUT ME

Software engineer for almost 20 years, and Engineering Manager for the last 6, at companies like Eventbrite, Typeform, Wallapop and now Blacklane. I lead cross-functional teams (Product, Design, Web, iOS, Android, Backend) and connect technical decisions with business value: booking and checkout flows, payments, partner integrations and customer growth. I care about people's growth, pragmatic architecture and strong testing. Outside work, I still ship: generative music, maps and web experiments at darkaico.com.

EXPERIENCE

Engineering Manager, Booker & Partner Experience *Barcelona (Remote)*
Blacklane *Feb 2026 - Present*

- Lead a cross-functional pod (Product, Design, Web, iOS, Android, Backend) that owns Blacklane's end-to-end B2B booking flows and partner journeys.
- Focus on a seamless and reliable checkout experience, scalable partner integrations, and healthy conversion across all guest touchpoints.

Engineering Manager, Discovery & Engagement *Barcelona (Remote)*
Blacklane *Apr 2025 - Mar 2026*

- Led a cross-functional pod (Product, Design, Web, iOS, Android, Backend) focused on new customer growth, retention, and account health across Blacklane's guest touchpoints.

Engineering Manager *Barcelona (Hybrid)*
Wallapop *Apr 2023 - Apr 2025*

- Engineering Manager of two teams: Payments and Checkout, and a web team that supported multiple topics within the tribe and aligned the mobile apps with the web.
- Coordinated delivery with Product and Engineering, led cross-functional efforts, and managed integrations with internal stakeholders and third-party payment partners.
- Responsible for the team's career growth. Drove collaboration, operational excellence, and solutions that improved the customers' payment experience.

Engineering Manager *Remote*
Typeform *Jan 2022 - Feb 2023*

- Engineering Manager of a new R&D initiative that explored, validated, and built new products for the Typeform ecosystem.
- Managed a team of 6 engineers, from Mid-Senior to Staff, and supported their career development.
- Worked with Product Managers and Product Designers to define and distribute work and to set expectations with stakeholders.
- Took part in technical discussions and architecture proposals, and aligned priorities with other Engineering Managers.

Engineering Team Lead → Engineering Manager *Remote*
Typeform (VideoAsk) *Aug 2020 - Jan 2022*

- Hands-on Engineering Manager of VideoAsk, a Typeform sub-product run as a "startup inside a startup".
- Built team culture and defined best practices within a startup environment.
- Developed features end-to-end for enterprise customers and provided technical mentorship to the team, focused on back-end development.

Lead Solutions Architect *Remote*
Capitole Consulting *Jan 2020 - Aug 2020*

- Analyzed requirements and defined primary architecture for in-house projects along with the initial setup of development baseline, standards, CI/CD, and dev workflows.

- Worked as a consultant for a SaaS company, managing two individual contributors.

Team Lead *Remote*
Eventbrite *Apr 2019 - Oct 2019*
- Led the team that focused on the main functionalities of big music organizers.
- Acted as Business Unit Architect, coordinating work between business units and focused on team growth and technical mentorship.

Senior Software Engineer II *Remote*
Eventbrite *Apr 2017 - Apr 2019*
- Led the team that integrated Ticketfly tools into Eventbrite after the acquisition.
- Designed, coordinated and implemented cross-tribe initiatives for music organizers.

Senior Software Engineer *Remote*
Eventbrite *Dec 2015 - Apr 2017*
- Worked on integrating functionalities from Eventioz into Eventbrite, including a significant project to transfer contacts into Cassandra.

Software Engineer *Remote*
Eventbrite *Oct 2014 - Dec 2015*
- Integrated functionalities from a recently acquired company into the Eventbrite ecosystem.

SKILLS

Management & Leadership: Team Leadership, Mentoring & Coaching, Stakeholder Management, Project Management, Agile Methodologies, Problem Solving, Decision Making
Technical Skills:
- Languages: Python, Ruby, TypeScript, JavaScript, SQL
- Frameworks & Libraries: Django, Rails, Flask, Next.js, React, Vite
- Cloud & Infrastructure: AWS, Cloudflare, Docker, Kubernetes, Terraform
- Databases: PostgreSQL, Cassandra, MySQL

PROJECTS

darkaico.com Explorations 2025 - Present
Personal web experiments built with Next.js, Tone.js and Cloudflare: Daily Melody (a generative melody from local weather), Inner Tempo (tap a rhythm, hear it as music), Where to Move (neighborhood sentiment from reviews), Sound Map, News Trends and Next Day Off. Some are documented on Medium.

Figma Plugins: PageStream and Marvelous Avatars 2024 - 2025
PageStream gave remote teams standardized Figma file templates, powered by a Ruby on Rails API. Marvelous Avatars creates Marvel-style avatars and is published on the Figma Community.

COMPLEMENTARY

University Professor Aug 2018 - Sep 2019
Practical applications professor of "Arquitectura de Microservicios" (Microservices Architecture) at UTN Mendoza.

University Researcher Jan 2008 - Dec 2009
Researcher at UTN Mendoza in two groups: an IPv6 test bed (CODAREC6) and a PSP-based software process project.

EDUCATION

Universidad Tecnológica Nacional, Mendoza, Argentina *2002-2010*
Software Engineering (2002-2010) · University System Analyst, intermediate degree (2002-2008)
